

Paranormal Map

Contributed by Bobbie Atristain
Last Updated Saturday, 02 January 2010

The Paranormal Operating Picture is the first time any paranormal researchers have created an interactive map to view paranormal places of interest. We now have our cases on the map. This map will be updated with new features often. It contains the following features now:

- CPRI Cases
- GeoLocated Tweets from the CPRI team
- Search Flickr for Paranormal Pics
- Ghost Cams from around the world
- Real time weather feeds from the NWS and NHC
- Google Street View integration
- MS Virtual Earth Integration
- Haunted Places in Virginia
- and much more to come

You will need the Adobe Flash Player 9 to view. It works best in Mozilla Firefox browser.

You can go to this address which will open in a new window to view the Paranormal Operating Picture.
